

**CLAIMS**

What is claimed is:

- 5 1. An apparatus comprising in combination: a medication and a round capsule of uniform cylindrical form, closed at one end thereof and open at an opposing end thereof; the capsule made of an edible product attractive to an animal; the capsule having a length of between  $\frac{7}{16}$  and  $\frac{7}{8}$  inches inclusive, a diameter of approximately  $\frac{1}{2}$  inches, and a round interior wall surface having a diameter slightly smaller than the girth of the  
10 medication and a length of at least equal to the length of the medication; the medication being in solid form and positioned within the wall surface of the capsule by wedging action.
2. The apparatus of claim 1 wherein the medication is harder than the interior wall of the capsule, and is of such size as to dislodge a portion of the interior wall when the  
15 medication is forced into the capsule.
3. The apparatus of claim 1 wherein the medication is soft and resilient and is of such size as to be secured within the capsule by plastic strain developed upon placing the medication within the capsule.
4. An apparatus comprising a round capsule of uniform cylindrical form, closed at one end  
20 thereof and open at an opposing end thereof; the capsule made of an edible product attractive to an animal; the capsule having a length of between  $\frac{7}{16}$  and  $\frac{7}{8}$  inches inclusive, a diameter of approximately  $\frac{1}{2}$  inches, and a round interior wall surface having a diameter of a size for engaging a medication by wedging action.
